Jerusalem / Rocky Fire Incident Weather

FORECAST NO:

11 D/N

NAME OF FIRE: Rocky Fire

PREDICTION FOR: SHIFT DATE:

Tuesday - 24 Hour Shift

Aug 11, 2015

FORECAST ISSUED: 1800 Aug 10, 2015

UNIT: LNU

Incident Meteorologist: Jeff Tonkin

WEATHER DISCUSSION:

A Pacific low pressure system will slide south and approach the north coast of CA today. This system will then gradually move east over northern CA Wednesday through Thursday. This feature is not expected to provide any precipitation or thunderstorms to the fires' area...however variable cloudiness and cooler conditions will continue through Wednesday. High pressure returns Friday with a much drier airmass over the fire area through Sunday. An easterly wind will also be present...especially during the nights and mornings. Daytime relative humidity values will fall to near 10% during this period...with recoveries up to only 30%.

WEATHER FORECAST TODAY (TUESDAY DAYTIME):

SKY / WEATHER: Some mid and high cloud cover at times throughout the day.

MAX TEMPERATURES: 81 - 86. MIN HUMIDITY 2000 ft: 20 - 25%.

WINDS (EYE LEVEL):

2500 FT: Variable 3 to 6 mph until 1400 PDT...Wind then increasing to West and Southwest

8 to 14 mph with Gusts to 20-25 mph between 1500 and 2100 PDT.

LAL: 1 CWR: 0%

STABILITY / INVERSION: Weakly Unstable.

SMOKE TRANSPORT WIND: South-Southwest 30 mph.

WEATHER FORECAST TUESDAY NIGHT:

WEATHER: Partly Cloudy (a few high clouds).

MIN TEMPERATURES: 56 - 61. MAX HUMIDITY: 65-70% WINDS (EYE LEVEL):

West or upslope 5 to 10 mph until 2400 PDT... Then becoming variable or downslope 3 to 5 mph until sunrise.

OUTLOOK FOR WEDNESDAY: A few high clouds in the morning...then sunny.

Max Temps: 82 to 86. Min RH: 22 to 26%

Wind: Light and variable through mid-day...then West or southwest 3 to 6 mph until 1400 PDT...then

increasing to 6 to 12 mph...gusts to 18 mph through 1900 PDT.

CWR: 0%. LAL: 1

Smoke Transport Wind: South-Southwest 30 mph.

EXTENDED FORECAST FOR THURSDAY THROUGH FRIDAY:

SKY / WEATHER: Sunny.

Max Temps...84 to 88. Friday: 93 to 97.

Min RH...18 to 23% on Thursday.......10 to 15% on Friday.

Wind(Eye Level) Thursday: Mainly west winds 8 to 14 mph with gusts 25. Friday: North and northeast 4

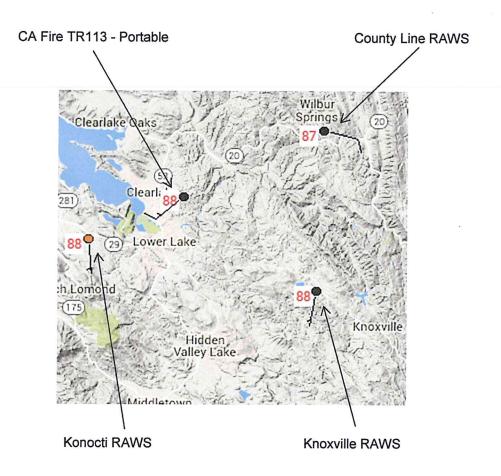

to 8 mph...gusts to 12 mph during the day.

LAL: 1 / CWR: 0%.

Transport Wind: Southwest 20 mph.

A QR code reader app can be downloaded on your smart phone. See FBAN or IMET for more information.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 011	TYPE OF FIRE: Wildfire
FIRE NAME: ROCKY / JERUSALEM	OPERATIONAL PERIOD: 08/11/15 0700-0700
DATE ISSUED: August 10, 2015	TIME ISSUED: 20:00
UNIT: CA-LNU-006984Rocky	SIGNED: Typed/printed:
CA-LNU-007410Jerusalem	Jeff Shelton (FBTS/LTAN) \$teve Volmer (FBAN-T)

INPUTS

WEATHER SUMMARY:

Conditions have dried out fuels for the past 7 days. Scattered high clouds will be present in the area. Expect Fire Behavior to increase when prime burning conditions are present between 1400 and 2000. Expect wind shifts to occur during the afternoon and aid in clearing out the smoke haze from the fire. Cloud cover will be present over the fire throughout the shift.

Max. Temperatures: 81-86 degrees Min. Humidity: 20-25%

Winds(Eye Level)- Morning: Variable/Upslope 3-6 mph until 1400

Afternoon/Evening: West and Southwest 8-14 mph with gusts to 20 mph till 2100, then shifting

downslope 3-5 mph from midnight to sunrise.

OUTPUTS

FIRE BEHAVIOR

GENERAL: *** Burning Index and Spread Component are just under the 90th percentile***

- Watch weather trends throughout the day. Fire behavior has responded predictably with:
 RH (below 30%), Temperature (above 85 Degrees), and Wind Speed (above 5 mph at Eye Level)
- Fire spread and intensity for the first 2 burn periods has Plume Dominate Fire Behavior
- Area East of HUNTER CREEK will be in full alignment with wind and fire spread directions after 1200.
- Expect humidity recover to hamper burn-out efforts after 2100.

SPECIFIC:

All Divisions: Spot fires, isolated flare-ups, and New Starts in the area.....

Flame Lengths- Up to 10 ft. in Grass, Up to 20 ft. in Brush, Up to 50 ft. from the tops of torching trees.

Rate of Spread- Up to 100 feet/minute in Grass, Up to 150 feet/minute in Brush.

Spotting Distances- Up to .4 miles in Grass/Brush, Up to .3 miles from Torching Trees.

Probability of Ignition- Unshaded Fuels 90% during the peak afternoon heating.

AIR OPERATIONS:

High cloud cover, with weak unstable air. Smoke lingering until noon. Mixing heights will again rise to 5,000 AGL during peak daytime heating. Expect turbulence to increase, and winds to shift in the afternoon. Transport winds will be from the Southwest at 30 mph.

Sunrise- 6:20 **Sunset-** 8:12

SAFETY

Establish LOOKOUTS early on, that can monitor both FIRE BEHAVIOR and changing WEATHER conditions.

Identify TRIGGER POINTS and areas of ALINGMENT early in the shift.

ROCKY and JERUSALEM FIRE SAFETY and HEALTH MESSAGE

We Are **ALL** accountable for **SAFE** behaviors

INCIDENT: Rocky and Jerusalem Fire DATE: August 11, 2015 TIME: 0700-0700

Major Hazards and Risks: Limited Resources, Drought Stricken Fuels, Fatigue, Narrow Roads, Terrain.

Fire Behavior: Fuels are drought stricken and are receptive to fire spread. As the weather pattern changes and begins to dry be alert to changes in fire behavior. Don't let the light rain make you complacent.

Drive Slow: Always drive defensively.

Maintain Situational Awareness - Conditions and fire behavior can change rapidly. Use P.A.C.E. (Primary, Alternative, Contingent, and Emergency) planning.

Manage yourself and those around you for excessive fatigue; many have driven long distances or been deployed for extended periods. Use the buddy system and take breaks as needed. As fatigue increase, injuries tend to increase also. Maintain situational awareness.

Hazard trees: Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow Hazard Tree Safety, pg. 22-23 in your IRPG.

Eat and drink fluids on a regular basis to maintain an appropriate energy level for any expected work assignment. Remember, you are the only one that knows your limitations.

Watch out for old abandoned mines: If you find one flag it and get GPS coordinates.

Review your ICS 206 and know what to do in the event of a medical emergency.

Lookouts, Communication, Escape routes, Safety zones

Heat Illness Prevention:

- Drink plenty of fluids:
 - Water and Gatorade
- Avoid drinking energy drinks
- Rest when you can
- Find shade when you can
- Eat nutritious food regularly

Tailgate Safety

- Accountability: everyone checks in and everyone checks out. Supervisors know where their crews are at all times
- **Communication:** everyone knows the com-plan
- Briefing: everyone knows the game plan, everyone knows the contingency plan
- Safety gear: everyone has the appropriate safety gear and in good working condition
- LCES: they are clear and made known to everyone

Incident Safety Officer: Chad Thompson SOF1-(T) Deputy Incident Commander: Scott Lindgren

ROCKY and JERUSALEM INCIDENT RISK ANALYSIS (ICS 215a)

BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
VII, VIII	EXTREME FIRE BEHAVIOR DRIVING HAZARDS	 Know your LCES and maintain Situational Awareness. Use experienced look outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH. Be alert for thunderstorm activity. Expect rapid rates of spread with long range spotting, have a contingency plan (PACE) with established decision points and safety zones. Drive defensively and slow down! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Slow Down! Narrow dirt roads with limited passing room. Coordinate your movements on one lane roads. Increase following distances. Maintain Situational Awareness.
ALL	STEEP TERRAIN	 Use warning devices when operating near traffic. Watch your footing while hiking in steep terrain. Be careful of loose rolling debris Maintain Situational Awareness.
ALL	FATIGUE/HEAT/DEHYDRATION	 Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible. Drink electrolyte drinks at a 2 water to one sport drink ratio.
VII, VIII	STRUCTURE DEFENSE & HAZARDS	 Conduct thorough briefing for all personnel (inside rear cover IRPG). Follow Wildland Urban Interface Guidelines (IRPG p. 12-16).
ALL	AIRCRAFT OPERATIONS	 Monitor Air to Ground - they are your eyes in the sky. Use air-to-ground freq. to communicate with aircraft. Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective. Avoid "heli-mopping". Eliminate unnecessary pilot exposure.
VII, VIII	POWER LINES	Follow <i>Power Line Safety</i> guidelines (IRPG pg.24.) Communicate power line hazards to immediate supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
VII, VIII	TACTICAL HAZARDS	 Follow 10's and 18's. Complete Go no Go checklist for firing operations. Review with SOFR Follow the Downhill Checklist. Know your LCES.
ALL	DOZER SAFETY	 Watch for rolling material. Monitor safe working distances. Avoid working below Dozer. Utilize communication with the operator (radio or hand signals)
ALL	HAZARD TREES	 Identify and Isolate the area to provide for the safety of others. Flag and make proper notifications. Do Not Fall trees out of your certification level.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY:

LINE EMERGENCY:

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - 1. Closest EMS resource
 - 2. Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested 1.
 - 2. Operations
 - Safety 3.
 - Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear a channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:

Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 - nications
 - Safety
 - Logistics 3.
 - 4. Operations
 - 5. Crew Supervisor
 - Comps/Claims

DEMOBILIZATION PLAN Jerusalem Fire CA-LNU-007410

DEMOB PROCEDURES

- CHECK THE DEMOB LIST EACH MORNING. YOU CAN FIND THE DEMOB LIST THROUGH THE "QR" CODE ON THE I.A.P. COVER OR ON LISTS POSTED THROUGHOUT CAMP. ONLY REPORT TO DEMOB AT YOUR SCHEDULED TIME. EARLY ADMITTANCE WILL NOT BE ALLOWED.
- PICKUP A DEMOB CHECKOUT FORM (ICS-221) FROM THE DEMOB UNIT, THEN GO TO THE FOLLOWING UNITS TO OBTAIN THE NECESSARY SIGNATURES:
 - ✓ SUPPLY UNIT
 - ✓ COMMUNICATIONS UNIT
 - ✓ GROUND SUPPORT/VEHICLE INSPECTION***
 - ✓ DOCUMENTATION UNIT
 - ✓ TIME UNIT
 - ✓ TRAINING UNIT (IF APPLICABLE)
 - ✓ ACCOMMODATIONS (IF APPLICABLE)

***VEHICLE INSPECTION:

- THE DEMOB UNIT WILL INFORM YOU IF YOUR VEHICLE NEEDS TO BE INSPECTED.
- You must have the ICS-221 Demob form with you at vehicle inspection.
- A VEHICLE INSPECTION TIME WILL BE PROVIDED WHEN YOU INITIALLY ARRIVE TO THE DEMOBILIZATION UNIT.
- DO NOT REPORT FOR VEHICLE INSPECTION PRIOR TO YOUR APPOINTMENT

RETURN THE COMPLETED ICS-221 FORM TO THE DEMOB UNIT AND TRAVEL SAFE HOME!

ROCKY FINANCE MESSAGE

- FINANCE SECTION IS LOCATED IN THE LITTLE THEATER BUILDING.
- HIRED EQUIPMENT VENDORS NEED TO STOP BY FINANCE WITH COPIES OF THEIR CONTRACTS ASAP.
- PLEASE REVIEW ATTACHED SHIFT TICKET GUIDELINES.
- KEEPING TRACK OF WATER SOURCES IS

 MANDATORY FOR ENGINES, WATER TENDERS, AND
 HELICOPTERS. THIS APPLIES TO ALL RESOURCES,
 REGARDLESS OF AGENCY, INCLUDING PRIVATE HIRES. USE
 THE ATTACHED FORM AND DROP OFF IN THE FINANCE
 SECTION.
- OFFSITE FEEDING IS <u>NOT</u> AUTHORIZED, EXCEPT FOR RESOURCES IN HOTELS IN UKIAH.
 - ONLY Dinner breakfast will be at base camp, sack lunches will be provided for lunch – pick up at base camp
 - Wingstop, 1430 N. State Street, next to Discovery Inn
 - Applebees, 1201 Airport Park Blvd, across from WalMart
 - o Henny Penny, 697 S. Orchard, near the Super 8
 - AO-341 sign-up sheet must be signed by each person eating

Financ	ce Contacts
FSC1 - Bill Winter 805-903-3491	COMP – Joe Eckblad 619-213-4418
DFSC – Pete Bymers 916-764-5074	PROC – Andre Schmidt 909-436-8192

GENERAL SHIFT TICKET INFORMATION

- Hired equipment day begins at 0001 and ends at 2400. Indicate equipment starting and stopping times. Use the 24 hour clock and round to the nearest 1/4 hour.
- Only one shift (day) per Shift Ticket and only one Shift Ticket per shift supervisor (DIVS).
- Must have license #, serial #(last six OK), etc. unless equipment does not have them.
- Government employee AND contractor/operator must sign the Shift Ticket.
- Put request number (E-23, S-10, etc.) on the Shift Ticket.
- Ask to see the previous shift's copy if necessary so that no breaks or overlaps occur in time keeping. Shift Tickets should account for every hour the contractor was under hire from the time of hire until their return to their point of hire, including rest times, travel, etc.
- If equipment is assigned and getting paid for 24 hours, two operator names must be on the Shift Ticket. If only one operator is listed, vendor will NOT be paid for 24 hours.
- If needed, do an inspection when the equipment arrives at the incident base for Compliment, Capacity and Capability. Note any damage.
- Operators must have personal protective equipment.
- Supervisor (DIVS) is to turn in pink and blue Shift Tickets daily to Equipment Time Recorder (EQTR), and keep white copy. The contractor keeps the yellow copy.

PUBLIC INFORMATION SECTION

Incident Public Information Line: (707) 967-4207

Incident Media Line: (916) 591-9008

MEDIA - The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence.

- Nor is the Media permitted on private property without the property owners permission.
- · If approached and questioned by the media and or the public, talk about your assignment or task at hand. If need be direct the questioning party to the incident PIO.
- · Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY, Social Media 0691 - Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore when on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the Information Section.

There will be no posting of:

- Inappropriate information or materials
- No opinions
- No endorsements
- Do not post inappropriate pictures or videos
- If you are uncertain, question.

PICTURES AND VIDEO OF INCIDENT - We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND - The Information Section will manage Lost and Found items for the incident. If you have lost an item leave your contact information and what you have lost at the Information Section. If you have found an item on the incident bring the item to the Information Section with your contact information as well.

MAIL SERVICE - The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

TRAINING ANNOUNCEMENT

ROCKY INCIDENT TRAINEES

In order to receive documented credit for your training assignment – **you must close out** with the Training Specialist before you Demob!!

JERUSALEM INCIDENT TRAINEES

In order to receive proper credit for your assignment, you must register with the Incident Training Specialist.

The Training Specialist is available immediately following the morning Operations Briefing. in the main building next to Check-In.

TRAINING SPECIALIST Claudia Soiza Cell-(949)632-7813

FIRE SUPPRESSION REPAIR PLAN: ROCKY INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is <u>not</u> the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be upgraded to their pre-fire condition. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities.

Examples of items that may be repaired include, but are not limited to:

Infrastructure:Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources ·	Adverse impacts to protected species of plants and
Utility distribution lines (above or below ground)	animals
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	
Down Line Density	

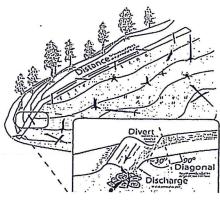

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Vehicle access to dozer line on Bureau of Land Management lands shall be blocked using tank traps or other similar methods.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

MA

Archaeological and Historic Properties: General Fire-line Guidance for the BLM Ukiah Field Office.

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

- 1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
- 2. Note, that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered.
- 3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
- 4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
- 5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
- 6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
- 7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
